

This week in **Maths** in Early Years we are learning how to find **one more** and **one less** for numbers up to 20.

The worksheet is divided into three columns:

- One Less:** Shows the number 6 written on a three-line grid. Below it is a 3x2 grid of 6 black dots. A cartoon cow is positioned at the bottom left of this column.
- My Number:** Shows the number 7 written on a three-line grid. Below it is a 3x2 grid of 6 black dots, with one dot missing from the bottom right position.
- One More:** Shows the number 8 written on a three-line grid. Below it is a 3x2 grid of 6 black dots.

To the right of the worksheet is a small card with a cartoon cow holding a clock showing the number 7. A white marker with a black cap is lying on the wooden surface next to the worksheet.
